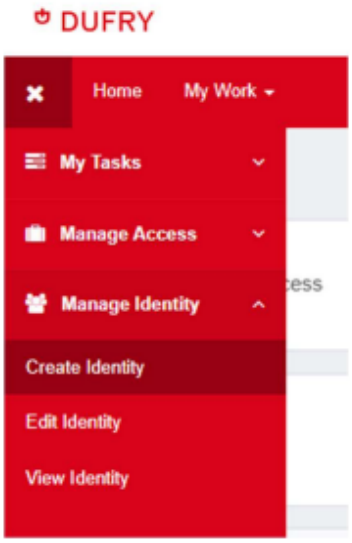
request more than 1 item per request) and Approval comment which is general for the approval. Requester can see the ITEM comment in access request, not the approval comment (unless requester goes to the Work Item for “Owner Approval - Account Changes for User: -requester name-”)

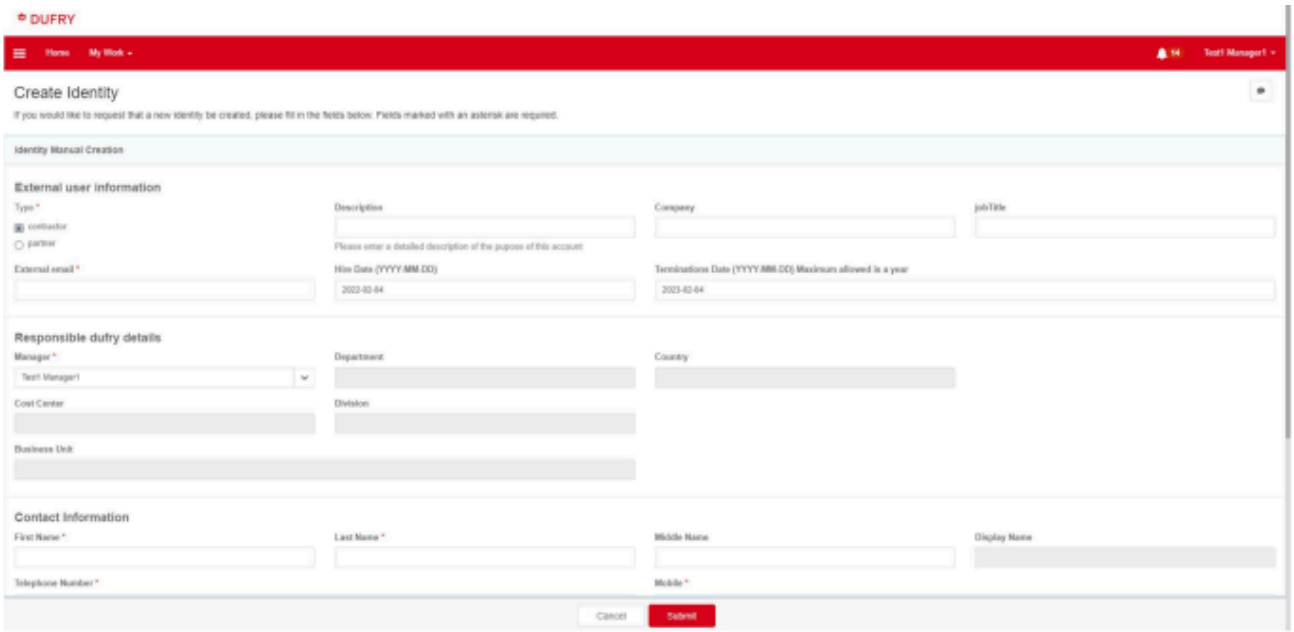
2.6.2 External user creation:

Managers can create identities for externals either they are contractors or partners.

1. Choose the option to create identity



2. Fill the fields as necessary with user information like, user type, external email, manager, name, lastname, etc.



Option “Contractor” is for external collaborators working in Dufry areas. UserID to be created T-xxxxxx

Option “Partnert” is for product distributors to Dufry. UserID to be created X-xxxxxx

Once submitted, this will trigger the workflow to create the identity and will generate the necessary Access request to provide birthrights accordingly. This triggers a notification email where user id and password are
